

PETANQUE

QUORPORATE GAMES...

Fun team-based **croquet** – **petanque** – **quoits** – **quornhole** for groups

PETANQUE: uniquely French...

The current game started in Provence as *petanca* in the local dialect from the expression *pès tancats* meaning 'feet fixed' i.e. players stand still to throw their boules.

Given our professional approach and light-touch adaptations, with the correct diameter and weight of metal boules, our version makes for a great fun team game on a stand-alone basis or in rotation with other outdoor teambuilding activities.

Petanque can be played on short flat grass or fine gravel or any fairly firm surface, and on lumpy/bumpy ground if required. Concrete and asphalt or long grass and fine sand are either too hard or too soft. Official game options are singles, doubles and triples, though quads is possible. For back-up we have soft indoor balls and target mats.

Each petanque piste (or lane to you and me) is ideally 4m x 15m – though 12m x 3m is perfectly acceptable. For a fixed start time session one coach can run up to 4 petanque lanes with time to offer advice on tactics and clarify rules etc; at a push this can be increased up to the maximum of 6 lanes. We particularly recommend 3-a-side/triples as an excellent team game, and we have enough equipment for 36 people to play at the same time. For open play the maximum with one coach is 3 lanes which with 3-a-side = 18 players. A second petanque coach is available.

PETANQUE

get your hands on a boule soon and you'll have a ball!

PETANQUE

up to 32 players at the same time!

QUORPORATE PETANQUE: what it's not...

One cheap garden centre set of plastic balls and no one to tell you exactly how or where to throw them! Nor does it get close to approaching the seriousness of the Pétanque England website - with an 'é' to prove their credentials.

QUORPORATE PETANQUE: what it is...

The right quality, weight and diameter of metal petanque balls to make a game for all to get engaged in, show their flair and feel quite French for a while. By using our black and silver boules, the players can more easily see and talk through the tactical options and appreciate the importance of playing together as an équipe!
